

LEO ZHOU

FULL STACK DEVELOPER • UX DESIGNER

leozhou.business@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio: leozhou.cc](#)

SKILLS

Languages: JavaScript/TypeScript, HTML, CSS, Python, Bash

Frameworks/Libraries: Next.js, React, Node.js, Express, Astro, Svelte, Tailwind, SCSS, Motion

Tools/Databases: Git, SQLite, Prisma, Drizzle, Convex, Redis, Clerk, Better Auth, Zod

Design Skills: Research, User Interviews, Prototyping, Usability Testing, UI Design, Design Systems, Wireframing

Other Tools: Figma, Vim, Linux, Photoshop, Illustrator, Premiere Pro

PROJECTS

Workout tracker web app | *Next.js, TypeScript, Convex, Zod, Better Auth*

[Link](#) | [GitHub](#)

- Built a full-stack workout tracking application with end-to-end type safety using Next.js, Convex, and TypeScript
- Implemented secure authentication with user-specific data isolation and Redis-backed rate limiting to prevent abuse and brute-force attempts
- Designed and implemented complex workout data models (workouts, exercises, sets, history) to support accurate performance tracking and progression analysis

AR app design to encourage tree planting | *Figma, User Research, Prototyping, User Testing*

[Link](#)

- Led a four-person team to design a mobile app promoting eco-friendly behaviour
- Conducted user research interviews to identify key needs and inform the design of user-centered solutions
- Built interactive Figma prototypes, refined through extensive usability testing to improve user experience

Mobile app design to reduce social media use | *Figma, User Research, Prototyping, User Testing*

[Link](#)

- Designed an app using user research on people's screen-time habits to guide decisions
- Ran multiple rounds of user testing and turned feedback into concrete changes to improve the app's core features
- Delivered a final prototype that users reported would meaningfully improve their productivity

EXPERIENCE

Web Developer and Designer

Feb 2026 - Current

Vertigo Visuals

Sydney, NSW

- Rebuilt company website from scratch, migrating from a basic web builder to a fully custom solution
- Automated invoicing and appointment scheduling, significantly reducing manual administrative workload
- Redefined brand visuals, layout, and user experience to enhance professionalism and customer trust
