

LEO ZHOU

Front End Engineer • UX Designer

leozhou.business@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio: leozhou.cc](#)

SKILLS

Languages: TypeScript/JavaScript, Python, Bash, Lua, HTML, CSS

Frontend: React, Vue, Svelte, Astro, Tailwind, GSAP, Framer Motion

Backend: Node.js, Express, Next.js, Tanstack Start, SQL, Convex, Auth.js, Better Auth

UX Skills: Research, User Interviews, Prototyping, Usability Testing, UI Design, Design Systems, Wireframing

Other Tools: Git, Figma, Vim, Linux, Photoshop, Premiere Pro, Typst

EXPERIENCE

Full Stack Developer

Feb 2026 - Current

Vertigo Visuals

Sydney, NSW

- Migrated company website away from basic web builder, redesigning branding and structure to improve professionalism and SEO performance
- Automated booking system using the Google Calendar API and Stripe, allowing for automatic email notifications and invoice creation, significantly reducing manual admin work
- Collaborated with business owner to design and prototype a smooth booking flow aligned with operational needs
- Continuously iterated on the booking experience by conducting user testing, improving UX in customer interactions

PROJECTS

Workout tracker web app | *React, Next.js, TypeScript, Convex, Better Auth, Tailwind*

[Link](#) | [GitHub](#)

- Built a full-stack workout tracking app with end-to-end type safety using Next.js, Convex, TypeScript
- Implemented secure authentication with per-user data isolation, along with caching and rate limiting to improve performance and prevent abuse
- Designed scalable data models for workouts, exercises, and progression tracking, enabling efficient queries and accurate performance insights over time

AR app design to encourage tree planting | *Figma, User Research, Prototyping, User Testing*

[Link](#)

- Directed a four-person team to design a mobile app promoting eco-friendly behaviour, coordinating design direction and aligning team efforts under tight project timelines
- Conducted user research interviews to identify key needs and inform user-centred design decisions
- Built interactive Figma prototypes, iterating across four testing cycles with multiple users to improve usability
- Presented project to industry professionals at the ADP Graduate Show Industry Crit

Mobile app design to reduce social media use | *Figma, User Research, Prototyping, User Testing*

[Link](#)

- Led a three-person team to design an app addressing screen-time habits, using research to drive product decisions
- Ran multiple user testing cycles, converting feedback into concrete improvements to core features
- Delivered a final prototype validated by users as effective in improving productivity

EDUCATION

Bachelor of Design Computing

Sydney, NSW

The University of Sydney

- Shortlisted for the ADP Graduate Show Open Jury Industry Crit
- Project featured in the ADP Graduate Show Catalogue
